WHO AM I?

Hie! I am Raihan Kabir, enthusiastic, self-taught programmer, working as a developer for more than 2 years now. During my journey, I was concentrated on several projects, mostly they were driven by Python on the server and JavaScript on the client. Over these years I was able to gather knowledge not only in these technologies also with different frameworks, which allow making development faster e.g. Django, Flask, Django Rest Framework in Python stack; jQuery, Vue.js, Nuxt.js in the Javascript stack. Apart from development I have a good understanding about version controlling system, CI/CD, linux system, API integration etc. I am a learner, real quick learner, problem solver and love to learn new cool technologies. I am looking for a challenging position that promotes both learning and growth.
